

## CarPool

### Utilities

Now users can access the web based CarPool application on their smart phones. This purposeful utility application will help parents to organize and manage carpool schedule as well as arrival and dismissal change management using their smart phones like Android. With the use of the native application user can login in the application with the help of eMail, password and school ID. This highly economical and fuel saver application will help parents to view details of schools and students along with their parents' names and addresses. The user can also make necessary changes according to her/his suitability. This application keeps the information of carpool clients safe and intact, therefore ensures complete credibility and security.
